## About Me

Highly skilled and experienced Full Stack Web Developer with a strong expertise in PHP, JavaScript, and frameworks such as Laravel. Possessing over 5 years of experience in web development, with proficiency in PHP, JavaScript, Laravel, and other relevant technologies. Experienced in API development and integration, as well as familiar with front-end technologies including HTML, CSS, and jQuery. Known for strong problem-solving and communication skills. A self-starter with a passion for Web Development, seeking an exciting opportunity to grow with a dynamic company.

### iconicthink – 01/02/2024 to continue

#### Mirupr, AJK Pakistan

- At IconicThink, I have worked on multiple web projects using PHP, Laravel, AJAX, and MySQL. My role involves full-stack development, focusing on building dynamic, database-driven applications with responsive frontends and secure backend logic. Some of the key projects I've contributed to include:

<https://buyitfaster.pk/>  
<https://costlessshub.ae/>  
<https://www.deliveringparcel.com/>  
<https://mirpurvisa.webguro.com/>  
<https://masae.webguro.com/>  
<https://deureum.com/>  
<https://politory.webguro.com/>

#### Jhelum, Punjab Pakistan

- **CloudLMS – Company Management CMS**
- CloudLMS is a company management CMS built with Laravel and jQuery AJAX, featuring multi-role access including Super Admin, Company Admin, Holding Company Admin, and Users. It allows holding companies and companies to add and manage their own users, with role-based permissions ensuring secure and organized access throughout the system.

### Project: BuyItFaster

---

BuyItFaster.pk is a multivendor marketplace built with Laravel where shop owners can register stores and sell products. Key features include brand, category, and product management; advanced coupon system (for all users, specific users, categories, or products with fixed or percentage discounts and valid date ranges); flash sales (e.g., clearance, winter, today's deals); flexible shipping charges (country-wise, city-wise, fixed or free); AJAX-based product filtering without page reload; dynamic filters and attributes; vendor order management with order status updates, and more.

### Project: costlessshub

---

CostlessHub.ae – Dubai-Based E-commerce Platform

CostlessHub.ae is a Dubai-based e-commerce website specializing in electronic products. The platform features product listings, brand and category management, secure checkout, discount coupon functionality, and order tracking. It provides a user-friendly shopping experience with responsive design and real-time interactions using AJAX for seamless browsing and filtering.

### Project: <https://lottery.webguro.com/>

---

Online Raffle System – [lottery.webguro.com](https://lottery.webguro.com/)

I developed an educational online raffle system where the admin can create raffles (e.g., Motorcycles, Mobiles, Cash), setting start/end dates, quantity, and price. The system automatically selects a random winner when the raffle ends and sends an email notification, ensuring a seamless and user-friendly experience for both admins and participants.

### Project: DeliveringParcel

---

DeliveringParcel.com – Global Parcel Forwarding Service

DeliveringParcel.com is a global shipping service platform. It allows users, especially from countries like Pakistan, to purchase products from international stores (e.g., in the USA) that do not offer direct shipping to their location. Users can register an account, submit product details, and the admin purchases the product on their behalf and ships it to their provided address.

### Project: <https://deureum.com/>

---

#### University Food Credit System

Backend Developer Laravel, MySQL, JWT, QR Code, Flutter

Developed a university-based food credit system with multi-level roles: Super Admin, University Admin, Restaurant Admin, and Students. Implemented secure APIs, QR code-based credit redemption, and real-time transaction handling in collaboration with a Flutter frontend team.
